Product Bulletin # PC-039 v 1.0	

External Antenna Upgrade

Canrig has released kits for upgrading the radio antenna on the PC3000 and PC4000 Automated Power Catwalks. The new antenna offering is installed in an external location, instead of within the catwalk skid, and aims to resolve communication issues with the remote controller caused by poor radio signal.

Recommended Action

Contact RIGLINE 24/7™ Support to schedule a technician to perform an installation of one of the following kits:

- For PC3000 – Canrig P/N: AY52175.
- For PC4000 – Canrig P/N: AY52176.
